

TULIP BULB PAPER

Sustainable paper with a truly Dutch touch

Tulip Bulb Paper is a range of paper and board materials made with a 20% inclusion of tulip bulbs. The use of these tulip bulbs in paper and board manufacturing unlocks an entirely new look for paper and board in which the tulip bulbs are still subtly visible. Perfect for use in any application that requires a somewhat playful and visibly sustainable basis!

Subtle yet visibly sustainable paper and board

Tulip Bulb Paper is a **playful and creative** range of paper and board products, developed in the **circular economy** spirit. Tulip bulbs that are unfit for being sold were previously unused and destroyed. But not anymore! After a year of collaborating with a Dutch tulip bulb producer, the value of these bulbs is now increased by transforming them into this attractive and unique range of paper and board materials. A mix of **20% tulip bulbs** and 80% wood-free FSC-certified cellulose is what makes this paper so special.

Tulip Bulb Paper offers a **distinctive and attractive tactile and visual value** that is perfect for any application which requires a subtle touch of natural playfulness. Its **unique appearance** elevates your product to the next level, and makes its sustainable nature visible without overdoing it. In other words: these specialty botanical papers do not only provide an **eco-efficient image**, but they can also truly differentiate your product in the market!

Surprise your customers!

Tulip Bulb Paper can be used for **many applications**: books, annual reports, magazines, advertising and general printing services, decorative and hobby purposes, packaging, printing and stationary products such as notebooks – anything is possible!

Tulip Bulb Paper is made to order and can be produced in any grammage between 100 and 500 g/m². This **uncoated** paper can easily handle **all common printing processes** and is **suitable for being creased and folded**.

About Schut Papier

The history of Schut Papier (member of the Clairefontaine group) dates back to the year 1618. Over the years, the paper mill has developed into a modern factory. Schut Papier's main products are art papers, watermarked papers, coloured papers and technical papers. In addition, the development of tailor-made papers, often in collaboration with its customers, is key to its business. Sustainability and the use of alternative fibres (such as tomato stalks, cocoa shells and recycled jeans fibers) are often at the heart of such developments.
